5/10/06

JFC's net income margin improved slightly from 5.5% of revenues in the first quarter of 2005 to 5.9% in the same period in 2006 as raw material cost increased only slightly with better Peso to US Dollar exchange rate and through cost improvement measures taken by the company. The improvement in gross profit margin was partly offset by the continuing increase in the cost of operations driven by higher cost of utilities and labor. Earnings per share of JFC stock grew by 24.0% from Php 0.36 in the first quarter of 2005 to Php 0.45 in the first quarter of 2006.

JFC Chief Finance Officer Mr. Ysmael V. Baysa disclosed that the company's annualized Return on Equity reached 17.9% in the first quarter of 2006, up from 16.8% in the same period last year as some of the company's businesses improved their profitability. Capital Expenditures, mainly for new stores likewise increased from Php 244.5 million in the first quarter of 2005 to Php 407.6 million in the same period in 2006. He also disclosed that even without the Red Ribbon profit contribution, JFC profit would have still grown by double digits in the first quarter of 2006 versus same period last year.
